39m52

Gold Versus the Dollar

40m50

43m46

US: Bankrupt gambler

- Dollar is still 65% of world currency reserves, but dropping.
- Euro up 50% against dollar since 2002
- \$3 trillion missing from Pentagon (Dov Zakheim)
- Current Account Deficit is over \$800 billion a year.

- Official debt hovers at \$9 trillion
- Estimated \$45-75 trillion in long-term debt
- CAFR: State and Federal Gov. looted

- US Debt is Japan's biggest asset
- China has trillions in US reserves and is diversifying (March 2007)
- IMF and BIS are demanding a further dollar depreciation

Robert Pastor

- Vice-Chairman of the CFR Task Force for North American Union by 2010.

- Calling for "Amero" to replace US Dollar, Canadian Dollar, & Mexican Peso

CALLING FOR A NEW 911?

"So, I'm not advocating, or encouraging, or wanting a crisis, I'm only saying that in order to take important initiatives, sometimes one manner in which this occurs is when there is a crisis to which leaders need to respond."

53m29

Robert Pastor admits power of staged crises for SPP

- "The 9/11 crisis made Canada and the United States redefine the protection of their borders," Pastor explained. "The debt crisis in Mexico forced the government to adapt a new economic model. The crises oblige the governments to make difficult decisions..."
- "What I'm saying is that a crisis is an event which can force democratic governments to make difficult decisions like those that will be required to create a North American Community," he said. "It's not that I want another 9/11 crisis, but having a crisis would force decisions that otherwise might not get made."
- This is like the PNAC "Pearl Harbor" comments

54m56

- Bush passes CAFTA in 2004; Bush and McCain shill for blanket amnesty and "guest worker" program; Bush pushing phony "virtual fence" with a \$2 billion handout to Boeing for spy drones; lobbying for FTAA to expand "free trade zone" to South America.
- FTAA is stalled because of Chavez in Venezuela, Morales in Bolivia, and Correa in Ecuador, Kirchner in Argentina.

59m34

Fence: A good idea turned bad (and then worse)

Massive \$2 billion handout to Boeing; 1,800 towers equipped with cameras, sensors and links to sophisticated computers along the nation's vast frontiers with Mexico and Canada.

Fence will become what blocks American dissidents and Muslims from escaping persecution during a martial law scenario.

NOT designed to stop immigration or drug flow. Part of "biometric tracking" border plan of SPP

1h00m03

Who needs a false flag attack? SPP Planners

- A false flag attack and never-ending "war on terror" benefits the traitors pushing for the North American Union and destruction of American sovereignty.
- Without a terror attack, SPP is too unpopular to pass

- 500-600 billion laundered by banks every year at enormous rates. This money is funneled into the stock market via select third parties and corporations to expand the bubble

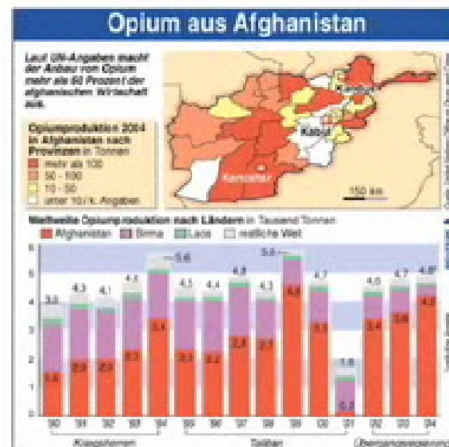

1h01m42

Coincidence? Bush allows open trucking from Mexico

- Last month the Bush administration cut a deal with 100 private Mexican trucking firms to allow unlimited shipping across the border, using the I-35 highway through Texas as the primary shipping route
- This proposed NAFTA superhighway will extend from the Mexican border at Laredo, Texas, to the Canadian border north of Duluth, Minnesota. This is the Trans-Texas Corridor, a 6-lane highway with adjacent railway and gas pipelines underneath from Mexico.
- Privately constructed and managed by a Spanish firm, Cintras, which is also buying up local newspapers in Texas and Oklahoma to stop

- **Peak Oil:** Staged shortages to increase oil prices, thus keeping demand for dollars high.
- **True:** Saudi Arabian in decline at world's biggest oil field, Ghawar. Mexico: decline of the world's second largest oil field, Cantarell. The world's third biggest, Burgan in Kuwait, is declining.

1h24m35

Problems with GNRC: Apocalypse when?

- Bill Joy, "Why the Future Doesn't Need Us"
- Nano self-replication can quickly get out of control and create a "grey goo" scenario where the earth, or even universe, are destroyed
- GE and Nano require knowledge, but fewer physical resources to create WMD to wipe out the human race.
- Computer virus example:

Is the next generation of technology worth it?

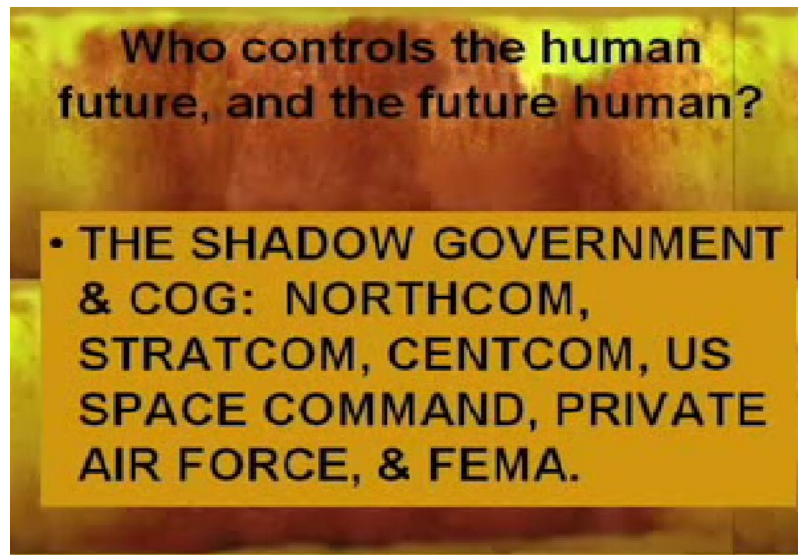

- Right now: The convergence of nano, IT, genetic engineering, robotics, cognitive science, virtual & augmented reality, and artificial intelligence, is increasing exponentially.
- A tiny elite control the future of human evolution, warfare, and reality.
- Can we blithely be "pro-science?" Is unrestrained technology something we want? Is it time to begin thinking about battling against this technology because it may destroy us?

1h30m31

Is technological “progress” the real enemy?

- Should this technology be restricted?
Should nanotech or genetic engineering be banned? **Can such a ban be enforced without an authoritarian regime?** Would such a ban even work in a global marketplace?
- What about an accidental apocalypse?
- Should this be included in 911 truth discussions?
- **Ultimately, even if the Global elite are defeated, these technologies remains a massive threat to existence. How do we respond?**

Mass Media: The Borg Hive Mind

- Seven corporations control the news
- Billions in fake newscasts
- Operation Mockingbird and CIA control
- Top media executives in CFR, Bilderberg

The Road to Tyranny: Blueprints for the control grid

- Global Tax (via carbon tax)
- National Sales Tax in USA
- Use your national ID card (REAL ID) with RFID chips to pay for everything. Cell phone/PDA based RFID also possible
- Every transaction is monitored by banking syndicates, "private" data warehouses (Axiom, Choicepoint), and government technocrats.
- Debtor prisons & forced service
- All personal credit can be wiped out with a single key-stroke
- Eventual move toward implanted microchips

Global Warming: The back-up route to world government

- Need to alleviate the "leftists" in Europe and US with "green global government"
- Enter Global Warming
- Maurice Strong (Rockefeller), Gore, Hagel, and the push for a global carbon tax

1h33m12

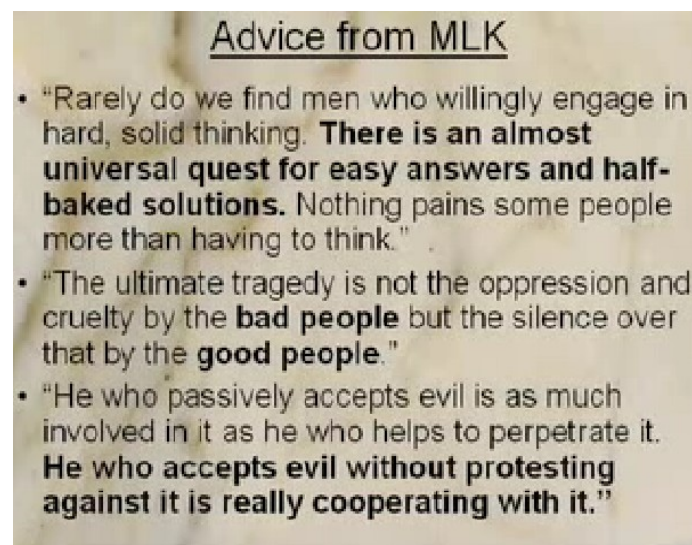

Reasons for hope:

- Bureaucracy mergers between massive military rules, computer systems, and entrenched powers will slow down the programs.
- Trailblazer and Groundbreaker are rumored to be failures.
- In major polls, 90%+ are against implantable microchips
- But false-flag terror might change that. Expect a movie-like script for the next attack, with nothing left to chance.

Risks for 911 “truthers”

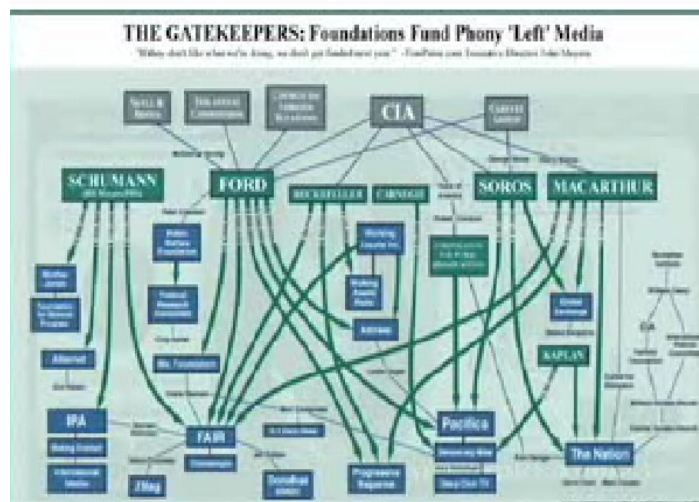

- Becoming an insular cult or exclusive social club with designated “leaders” and a mass of followers (AA meeting/Star Trek convention?)
- Expecting heroes to lead the “movement” toward “victory”
- Lack of social interaction and networking at meetings and events (we can learn from the Left)
- Acting like abrasive religious zealots with “recruitment” and “waking up” to the “truth”
- Following the JFK assassination with infighting, egos, backstabbing, FBI agents, & diminishing numbers at conferences
- Racial and gender homogeneity: the white male problem
- Lack of outreach to working class, urban areas, Spanish speakers
- Single-issue focus: Losing track of everything else (especially global poverty, future technology, economic breakdown)
- Ignoring the military shadow government (NORTHCOM-STRATCOM-NRO-Space Command)
- **Too much fear!** Causes lack of substantive activism
- Lack of focus on positive local formulas (ex: fluoride eradication)
